Janison enables University of London students to sit exams at home

Janison Education Group Limited (ASX:JAN) (“Janison” or the “Company”), an award-winning education technology pioneer transforming the way people learn, is pleased to announce it has been selected to provide the technology and services to deliver exams online for distance and flexible learning students of the **University of London** (“UoL”).

Key Highlights:

- **37,000 UoL Student Exams to be Digitised across 100 Countries**
- **AI & Human Proctoring Technology to be Utilised**

Remote Exam Delivery - UoL

Janison has been selected to deliver 37,000 examinations online for students of the University of London studying through distance and flexible learning in 100 countries. The deal is expected to be worth approximately \$650,000 for Janison over the next two years.

Janison’s edtech solution will allow the University to complete its critical assessment needs amid the global travel lockdowns caused by the COVID-19 crisis. It is the first time that some of the University’s study programmes will deliver exams digitally, and the first time the University will make use of remote proctoring technology.

Janison, the University of London and its CoSector arm specialising in digital solutions for higher education have all worked to a very tight deadline to make these examinations possible for its students, whilst meeting professional requirements.

Craig O’Callaghan, Director of Operations and Deputy Chief Executive, University of London Worldwide, said: *“This has been an incredibly fast moving project to ensure that all our students studying through distance and flexible learning across the world are provided with continuity and certainty for their examinations. The reputation of the University of London is based on the rigour of its examinations and we are confident that our online timed examinations will stand up to the rigour.”*

Mark Newton, Managing Director of CoSector, the University of London’s division providing digital solutions for higher education in the UK, said: *“We are confident that after a great deal of due diligence, we have the right solution with Janison in meeting the needs of our examinations and that of our students, who are spread right across the world with different levels of digital capability.”*

In collaboration with CoSector, examinations will be delivered remotely to the safety of students’ homes. The project combines digital exam platform, Janison Insights and remote proctoring solution, Janison Remote.

Students will sit the online examinations at home, with the session recorded via webcam and uploaded for review for integrity against the University’s strict exam guidelines. The proctoring video will then be quality assured by the University to ensure a secure and equitable delivery for all students.

David Caspari, Janison's Chief Executive Officer, said of the project: "Education continuity is the foundation of the education sector's business model. By allowing students to continue their assessments on schedule, this project directly addresses and overcomes the standstill that the higher education sector has suffered as a result of world-wide COVID-19 lockdowns."

Last month, Janison announced it will be delivering up to 50,000 university entrance exams remotely to students for the Czech Republic assessment firm SCIO, over the rest of this year. A simultaneous \$7 million capital raise from notable EdTech investors that same week reflected the market appetite for Janison's hybrid solutions to solve a worldwide problem, particularly in the key area of secure high-stakes assessment delivery at scale.

Background

The University of London was established by royal charter in 1836 and is a federal research university located in London, England. As of March 2020, the university consisted of 17 member institutions and three central academic bodies.

University of London's 17 member institutions include Russell Group universities such as King's College London, Queen Mary University of London, London School of Economics & Political Science and University College London (UCL).

It is one of the world's leading providers of online and distance learning, and offers online and flexible programmes to some 50,000 students in more than 180 countries, studying on over 100 degrees, diplomas and certificates.

Janison's sizable in-house proctoring team have more than 30 years' experience proctoring face-to-face exam events and, now that the delivery for facilitated paper exams has dramatically fallen, Janison is proud to bring their proctors' experience and capabilities to the digital exam environment.

About Janison Education Group

Janison, a publicly listed multi-award-winning Microsoft education partner, successfully delivers online assessment events to millions of candidates in more than 100 countries, for organisations including the British Council, the Organisation for Economic Co-operation and Development (OECD), Singaporean government, and national and state government departments in Australia.

It is an Australia-based education technology pioneer which, since it began in 1998, has been transforming the way people learn. It provides two primary offerings in the education technology industry:

Janison Insights – *a leading global online assessment platform for the provision of large-scale digital exam authoring, testing, and marking, servicing national education departments, tertiary institutions and independent educational bodies.*

Janison Academy – *a leading integrated learning platform used by large enterprises and government departments to build capacity in their people.*

Forward looking statements

This announcement contains forward looking statements. All statements that address events or developments that Janison expects or anticipate will or may occur in the future and guidance on financial performance are forward looking statements. These forward-looking statements are based on the Board or management's beliefs and expectations based on information currently available to the Board and management. The Company believes that these forward-looking statements are reasonable as and when made. However, you should not place undue reliance on any such forward looking statements which are inherently uncertain. Janison does not undertake any obligation to publicly update or revised any forward-looking statements whether as a result of new information, future events or otherwise except as required by law or the ASX Listing Rules. Forward looking statements are subject to certain risks and uncertainties many of which are outside its control that could cause actual results, events and developments to differ materially from Janison's historical experience, or its present expectations or projections.
